

REMARKS

The specification has been amended on page 1 to include the Section 371 data and to insert an Abstract of the Disclosure.

The claims have been amended to more clearly define the invention. Original claim 1 (now claim 34) has been amended to specify that one of the change features is an increased hollow volume, basis for which can be found in original claim 2. Original claim 10 (now claim 43) has been amended to specify that one of the engineered/architected features is an increased hollow volume, basis for which can be found in original claim 11. Claim 44 finds basis in original claim 11. Original claim 16 (now claim 49) has been amended to correct the term "disaggregation" to "deaggregation". Care has been taken not to introduce any new matter into this national phase application.

The original claims were also amended to remove multiple dependencies and to place the claims in a more preferred form for U.S. practice.

Upon entry of this amendment, claims 34-64 will be present in this application.

Favorable action on this application is solicited.

Respectfully submitted
